Features

- **Create the ambience of your choice:** More than 16 million colours for you to choose from. Eight scene modes (Night, Reading, Party, Leisure, Soft, Rainbow, Shine, Gorgeous) for you to enjoy the lighting in your life.

- **Smart voice control:** No hub required, works great with Alexa, Google Home, and IFTTT, so that you can easily turn on/off the bulb, adjust the colour with just your voice.

- **Light your home smarter:** You can use it in anywhere in your home, such as kitchen, bedroom, living room, hall, porch, pantry, wall light, stairs, giving you a special smart home.

- **Simplify your life:** It has a remote control function, controlled by an app (ENERJSMART for free) on your phone (Android 4.1 above and ios 8.0 above). No monthly fees or Hub needed for this product.

- **Timer Setting & Group Control:** The sleep timer will automatically turn on/off the light after setting. You can create a group for all your smart devices and control them all in one command. You can share your lamps with your family, then invite them to control.

RGB Colour Changing:
Match your mood with 16 Million colour options.
